DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 18-26 drawn to transformer structure, classified in class 336, subclass200.
 - II. Claims 10-17, drawn to method of manufacturing, classified in class 29, subclass 602.1.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article as defined by the claims of group I can be made by other method than those set forth in the claims of group II. For example, by method wherein preformed conductor structure is encapsulated by green ceramic material and then the ceramic/conductor assembly is fired.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/055,425

Art Unit: 2832

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
